GAS DIFFUSER

Andocor gas diffuser is a medical device for intraoperative wound ventilation with CO_2 to prevent air embolism and bacteriological contamination during surgery. By creating a continuous flow of CO_2 in the intraoperative wound, air and bacteriological particles are removed.

Features & Benefits

- ✓ Innovative microporous diffuser tip
- ✓ Hydrophobic diffuser tip remains functional even when wet
- ✓ Bacterial filter
- ✓ Malleable section allows precise placement

HEMOCONCENTRATORS

Andocor hemoconcentration filters are intended to relieve or mitigate overhydration in patients undergoing cardiopulmonary procedures and to increase concentrations of cells and proteins in the blood.

Features & Benefits

- ✓ Pre-rinsed or non-rinsed filters
- ✓ Standard or custom-made blood lines
